

Software Engineer - Configuration (entry level)

Company Description

Cognition is a small, fast moving company that provides a flexible, diverse, and exciting work environment. Cognition provides a suite of software tools to capture and model all aspects of product design, and provides enterprise wide collaborative access to the design model. We also provide consulting services and training in the deployment and use of these solutions.

Overall Job Responsibilities

The Software Engineer will work with the Cognition team to design and develop configurations on the Cognition Cockpit Platform. Configuring the Cockpit Platform involves using built-in configuration wizards and writing configuration scripts using a combination of a proprietary object oriented language, JavaScript, jQuery, and HTML. A candidate for this position is expected to be able to quickly learn new skills in all of these areas and be comfortable working closely with customers to understand their unique needs.

In addition to the configuration development responsibilities, the Software Engineer may perform various technical and support tasks. These may include occasional customer or internal support, testing, and updating company documentation. The development and other activities will require the Software Engineer to coordinate and communicate with other team members, departments, and customers.

The person who fulfills this position is expected to:

- Be part of an agile team that configures Cognition Cockpit and Cognition Compass
- Participate in design sessions for new product features and capabilities
- Work directly with the Engineering team to design and develop configuration strategies
- Participate in customer meetings as a technical resource
- Attend conferences to provide support to sales, marketing, and our customer base
- Be flexible and adaptable to meet the often changing needs of a small and growing company

Requirements

- Bachelor's degree in engineering or computer science
- For engineering major: scripting or other programming experience
- For C.S. major: Experience with object oriented and web scripting languages
- Detail oriented nature
- Excellent verbal and written communication skills

Desired Experience

- Experience with some of the following HTML, CSS, JavaScript, XML, jQuery
- Experience in the medical device or pharmaceutical industries
- Experience with Systems or Design Engineering methodology
- Experience with Requirements Management or Product Development software applications

24 Hartwell Avenue, 2nd Floor
Lexington, MA 02421-3139
1.781.271.9300

- Commercial experience (as intern or post-graduation)

We value passion and an agile mind over knowledge of specific technical skills.

Salary/Benefits

Salary is commensurate with experience.

Cognition offers a wide variety of competitive benefits to help meet your needs and to help you balance your work and personal life. Benefits include choices for medical, dental and life insurance; a 401(k)/profit sharing plan; disability plans; a flexible holiday and paid time off program.

Cognition does not sponsor applicants or employees for employment visas. Being authorized to work in the United States is a precondition for hiring for this position.
