

Software Engineer

Company Description

Cognition is a small, fast moving company that provides a flexible, diverse, and exciting work environment. Our mission is to improve human health by making the electronic submission of regulatory filings to FDA and Notified Bodies accurate, complete, and efficient. Cognition provides a suite of software tools for life science companies to capture and model all aspects of product design, and provides enterprise wide collaborative access to the design model. We also offer consulting services and training in the deployment and use of these solutions.

We value passion and an agile mind over knowledge of specific technical skills.

Job Description

As a Software Engineer at Cognition, you will work with the team to design, develop, and configure Cognition Cockpit. Your typical day will span the gamut from writing the front-end using HTML/CSS/JavaScript to designing algorithms to efficiently retrieve and process data on the back-end using object-oriented languages. Are you up to the challenge of working with three or more different languages – at the same time?

Your primary responsibilities:

- Engage as an agile team member who designs, develops, configures, and maintains the Cognition Cockpit
- Participate in design sessions for new product features and capabilities
- Work directly with the Engineering team to design and develop configuration strategies
- Participate in customer meetings as a technical resource
- Write and review design specifications
- Attend conferences to provide support to sales, marketing, and our customer base
- Be flexible and adaptable to meet the often-changing needs of a small and growing company

Requirements

- Bachelor's degree in computer engineering or computer science
- Experience with object-oriented languages (at least one of: C++, C#, Java)
- Experience with web scripting languages (JavaScript, jQuery, HTML, CSS, XML)
- Detail oriented nature
- Excellent verbal and written communication skills

Desired Experience

- Experience with Git
- Experience with SmartClient, Bootstrap, or another framework is a plus
- Experience with Systems or Design Engineering methodology
- Experience with Requirements Management or Product Development software applications
- Commercial experience (as intern or post-graduation)

Salary/Benefits

Salary is competitive and commensurate with credentials and experience.

Additionally, Cognition offers a wide variety of competitive benefits to help meet your needs and to help you balance your work and personal life. Benefits include:

- Choices for medical, dental and life insurance
- A 401(k)/profit sharing plan
- Disability plans
- A flexible holiday and paid time off program

Job Location: Lexington, MA
